Clarus Waiver

At R City Eye Care, we believe in using the most advanced technology to evaluate and manage conditions of the eyes. The Clarus is the latest ultra wide-field digital retinal imaging system, providing our doctors with 200 degree views of the retina in true color. This image will become a part of your permanent health record, enabling early detection of subtle changes from year to year. Clarus imaging is not the same as dilation, but, in most cases, the eyes will not need to be dilated during your routine examination if you have a Clarus image taken. If you have a medical eye condition that requires more advanced imaging, it will be required. The advanced imaging can be filed with your medical insurance, and you will not be charged for the screening image.

_____ Yes, I would like to have digital retinal screening performed. I understand that this is not covered by insurance and that there is an additional fee of $36.

_____ No, I would prefer to have my eyes dilated. I understand that my vision will be compromised and that I will have light sensitivity for 4-6 hours.
